The Ghost Of You is an awesome well written adventure for anyone who loves reading like myself. As a few reviews have already said you can really see that this was a labour of love. The pacing is good and I very much enjoyed the amounts of emotionally charged choices that Libretto has to make. I also loved that there was so much backstory to each cast member and their families. I think if you are in the mood to lose yourself to an intense and gripping story then this is right for you. Really looking forward to future releases from these girls..
